Метод, используемый для гуманной эвтаназии животных, должен отвечать двум условиям:
1. Причинять животному минимальное количество боли и страданий.
2. Смерть должна наступать быстро на сколько это возможно.

Также не маловажным в выборе является научный интерес и влияние метода эвтаназии на биологический материал, получаемый от животных. Для принятия верного решения, ниже приводим список полезной литературы. (Список предложен учебным модулем на платформе https://researchanimaltraining.com/ модуль 06.humane methods of killing)
